

## **Christina O'Guinn**

Program Manager

Christina comes to the John W. Gardner Center and the Youth in the Middle Project from NASA Ames Research Center, where she developed and managed educational programs, and designed instructional materials including interactive multimedia products, online design challenges and in-depth science and math curriculum. Most recently, she led NASA Ames' Informal Education Program, and built partnerships between formal and informal education providers to promote Science, Technology, Engineering and Math (STEM) literacy. Prior to this, Christina taught fifth and sixth grade at two Title I schools in Evergreen School District, served as an adjunct professor at California State University, East Bay and worked at The Tech Museum of Innovation as an Educational Specialist and Museum Program Developer. Christina has her M.A. in Instructional Technology from San Jose State University, her B.A. in International Studies from University of Oregon and her Multiple Subject Teaching Credential from Santa Clara University.
